## Company Profile

## **Data and Research - “Informed Choices - Not Chances”**

If you are part of – or affected by – the residential real estate industry, NewHomeTrends will provide a competitive advantage to help you stay ahead of the market.

NewHomeTrends’ combination of expertise, experience and knowledge can help you gain confidence with virtually any development, building, or sales and marketing situation. Our team approach taps the talents of builders, developers, government officials, sales and marketing professionals, and financial institutions to give you a complete picture of the market.

It starts with an extensive database that is updated daily. NewHomeTrends tracks almost all data related to the residential building industry, including plat submittals/approvals, construction start dates, lot sizes, square footages, selling prices, amenities, sales and closings.

We gather this information the old-fashioned way; by personal, face-to-face contact with builders, realtors, and city and county officials. We have the “feet on the street” to search through jurisdiction records, visit sites, track published information, and conduct focus groups and other surveys.

By utilizing our website, you can access the most current information available regarding new residential construction 24/7. Our database is more comprehensive than ever, offering:

- Detailed information on residential new housing construction
- Complete tracking for each community from plat submittal to final closing
- Continual updates for active communities
- A comprehensive selection of reports for your business solutions.

## Consulting and Custom Reporting – “If you don’t know, don’t build!”

Data itself is not knowledge. Knowledge comes from interpreting data and understanding how it might impact the real estate industry. Our experience, vision, and understanding of the marketplace allow us to provide both quantitative and qualitative reports and make realistic recommendations to our clients for successful projects.

We tell our clients what they *need* to hear, even if it isn’t what they *want* to hear. While this may not make us the most popular folks at the table, it certainly makes us among the most valuable.
